This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

### Legend

- The information about this item is included in this report.
  - The information about this item is not included in the report filter.
- 

### Platforms

- Linux
- Windows

### Component list

#### Desktop

- Design Manager Client 5.0.2
- Rhapsody Desktop

#### Server

- Design Manager Server 5.0.2

### Capabilities

#### Prerequisites

- Application Servers
- Databases
- Installation
- Java SDK
- Licensing
- Web Browsers

#### Related Software

- Collaboration
- Data Sources
- Development Tools
- Eclipse Runtime Environment
- Java

## Data Sources Notes

1. Requires SA COM API
2. For details on how the import from rose feature maps elements from Rose to Rhapsody see Rhapsody help topic: "Map Rational Rose constructs to Rational Rhapsody elements"
3. Integration of Statemate models, using "Statemate Block" into Rhapsody in C Architecture.

## Development Tools

### Summary

Supported software	Version	Supported software minimum	Product minimum	Components  	Operating system restrictions?	Notes?
Google Chrome	34 and future fix packs	34	8.1.2	 	No	No
Microsoft Internet Explorer	9.0 and future fix packs	9.0	8.1.1	 	No	No
	10 and future fix packs	10	8.1.1	 	No	No
	11 and future fix packs	11	8.1.1	 	No	No
Mozilla Firefox ESR	24 and future fix packs	24	8.1.1	 	No	No
	31 and future fix packs	31	8.1.1	 	No	No

## Google Chrome 34 and Future Fix Packs

**Legend:**  Supported  Not supported

### Components

#### Desktop

-  Design Manager Client 5.0.2
-  Rhapsody Desktop

#### Server

-  Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	34	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

## Microsoft Internet Explorer 9.0 and Future Fix Packs

**Legend:** Supported Not supported

### Components

#### Desktop

Design Manager Client 5.0.2

Rhapsody Desktop

#### Server

Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	9.0	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

## Microsoft Internet Explorer 10 and Future Fix Packs

**Legend:**  Supported  Not supported

### Components

#### Desktop

-  Design Manager Client 5.0.2
-  Rhapsody Desktop

#### Server

-  Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	10	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

## Microsoft Internet Explorer 11 and Future Fix Packs

**Legend:**  Supported  Not supported

### Components

#### Desktop

 Design Manager Client 5.0.2

 Rhapsody Desktop

#### Server

 Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	11	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

## Mozilla Firefox ESR 24 and Future Fix Packs

**Legend:** Supported Not supported

### Components

#### Desktop

Design Manager Client 5.0.2

Rhapsody Desktop

#### Server

Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	24	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

## Mozilla Firefox ESR 31 and Future Fix Packs

**Legend:** Supported Not supported

### Components

#### Desktop

- Design Manager Client 5.0.2
- Rhapsody Desktop

#### Server

- Design Manager Server 5.0.2

### Product Support for the Supported Software Maintenance Levels, Current and Future

Deployment unit	Component	31	Future Versions, Releases	Future Fix Packs
Desktop	Design Manager Client 5.0.2			
	Rhapsody Desktop			

# Hardware

---

Rational Rhapsody 8.1.2.1 requires the following hardware, organized by type of hardware, deployment units, or components.

---

## Installable software

### Operating System Families

[Windows](#)

## Windows

Hardware	Components	Requirement	Applicable operating systems
Disk Space	<b>Desktop</b> <ul style="list-style-type: none"><li>Rhapsody Desktop</li></ul>	1.6 GB (one language), 2.3 GB full installation 1 GB Installation temporary disk space	All supported Windows operating systems
Memory	<b>Desktop</b> <ul style="list-style-type: none"><li>Rhapsody Desktop</li></ul>	RAM: minimum 512 MB, recommended 1024 MB	All supported Windows operating systems
Processor	<b>Desktop</b> <ul style="list-style-type: none"><li>Rhapsody Desktop</li></ul>	Pentium 4, 3.00 GHz (minimum)	All supported Windows operating systems

# Glossary

---

## Bitness

Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.

**31:** The product or part of the product runs as a 31-bit application in a 31-bit operating environment.

**32:** The product or part of the product runs as a 32-bit application in a 32-bit operating environment.

**64-tolerate:** The product or part of the product runs as a 32-bit application in a 64-bit operating environment.

**64-exploit:** The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.

---

## Co-packaged

Additional products that are included in the product package.

---

## Co-installed

Additional products that are included in the product package and installed when the product is installed.

---

## Deployment unit

**Deployment Structure** identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.
- Deployment units may be further divided into deployable **components**

**Desktop** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

**Server** deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

**Agent or client** deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent or client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

**Mobile** deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

<b>Hypervisor</b>	A virtual machine in which a product can run on a guest operating system.
<b>Limited operating system support</b>	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
<b>Operating system minimum</b>	The minimum operating system maintenance level that is required to run on the product.
<b>Prerequisite minimum</b>	The minimum maintenance level that is required for the prerequisite to work with the product.
<b>Product minimum</b>	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
<b>Supported software minimum</b>	The minimum maintenance level that is required for the supported software to work with the product.
<b>Maintenance Support Release</b>	A Maintenance Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
