Software Product Compatibility Reports

Detailed System Requirements

Product

Rational ClearCase 8.0.1.9

Contents

Included in this report

This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

Legend

- The information about this item is included in this report.

- The information about this item is not included in the report filter.

Platforms

- AIX
- HP
- Linux
- Mac OS
- Solaris
- Windows

Component list

Desktop

- Automatic Views for CCRC
- Cadence Virtuoso Integration
- ClearCase Remote Client (CCRC)
- ClearTeam Explorer Extension
- ClearTeam Explorer for Eclipse IDE
- MS Visual Studio Integration
- Native Client

Server

- CC Core Server
- CCRC WAN Server
- ClearCase zOS Extension
- Multisite Core Server
- Multisite Shipping Server only

Capabilities

Prerequisites

- Application Servers
- Installation
- Licensing
- Web Servers

Related Software

- Asset Management
- Configuration Management
- Development Tools
- Eclipse Runtime Environment
- File Servers
- Installation
- Java
- Java SDK
- NFS Clients
- Reporting and Analysis

Capabilities

- Requirements Management

- Terminal Services

- Testing Tools

Operating Systems

The Operating sysytems section specifies the operating systems that Rational ClearCase 8.0.1.9 supports, organized by operating system familiy.

Operating system families

Windows

Component support

● Full

◐ Partial

○ None

Windows

Summary

Operating system	Operating system minimum	Hardware	Bitness	Product minimum	Components ⬚ 🖳		Notes?
Windows 10 Enterprise	Base	x86-32	32	8.0.1.9	◐	○	Yes
Windows 8.1 Enterprise	Base	x86-64	64-Tolerate	8.0.1.2	◐	○	Yes
Windows 10 Enterprise	Base	x86-64	64-Tolerate	8.0.1.9	◐	○	Yes

Windows Notes

1. Support for Windows 2012 R2 added in ClearCase 8.0.1.2

2. ClearCase context menus are not displayed when using 64-bit Microsoft® Windows® Explorer including ClearCase 8.0.x. Refer to technote 1251833

3. US Government Configuration Baseline (USGCB) support for Windows 7 was added in ClearCase 8.0.0.2. See technote 1589108 for details.
   ClearCase context menus are not displayed when using 64-bit Microsoft® Windows® Explorer including ClearCase 8.0.x. Refer to technote 1251833

4. ClearCase context menus are not displayed when using 64-bit Microsoft® Windows® Explorer including ClearCase 8.0.x. Refer to technote 1251833
   Note that Windows Server 2008 released with the SP1 code included

5. Support for Windows 10 added in V8.0.1.9

6. ClearCase context menus are not displayed when using 64-bit Microsoft® Windows® Explorer including ClearCase 8.0.x. Refer to technote 1251833

7. US Government Configuration Baseline (USGCB) support for Windows 7 was added in ClearCase 8.0.0.2. See technote 1589108 for details.

8. Support for Windows 8.1 was added to ClearCase 8.0.1.2.

9. Note that Windows Server 2008 released with the SP1 code included

10. This operating system is no longer in service. Please refer to IBM's policy on unsupported operating systems:
    http://www.ibm.com/support/customercare/sas/f/handbook/policies.html#unsupported

Development Tools Notes

1. CC and CQ Versions must match for compatibility if both products are installed on the same system . Except that support is provided for version incompatibilities for the LAN ClearCase/WAN ClearQuest integration that utilizes the ClearQuest OSLC REST interface , see technote 1398642

2. Integration with Word, PowerPoint and Excel only.
   The default file type for Word in Office 2007 (.docx), is not supported for use with the diff and merge capabilities of the "ms_word" type manager as it uses both XML and compression, and therefore is binary.

3. CTE supported for Web Views only

4. CC and CQ Versions must match for compatibility if both products are installed on the same system . Except that support is provided for version incompatibilities for the LAN ClearCase/WAN ClearQuest integration that utilizes the ClearQuest OSLC REST interface , see technote 1398642
   Discontinued usage of native ClearQuest clients in the ClearQuest - UCM integration, supported with ClearQuest Web.

Hardware

Rational ClearCase 8.0.1.9 requires the following hardware, organized by type of hardware, deployment units, or components.

Installable software

Operating System Families

Windows

Windows

Hardware	Components	Requirement	Applicable operating systems
Disk Space	**Desktop** • ClearTeam Explorer Extension • ClearTeam Explorer for Eclipse IDE	Minimum requirements All feature install requires 482 MB Client-only install requires 463 MB In addition, any host that will have snapshot view directories requires enough disk space to contain all files loaded into the snapshot views and all view-private files added to the views. The amount of space required depends on the number and sizes of the files in the views. Any host that will have VOB- or view-storage directories must have enough disk space to contain the files and databases used for storage of VOB- or view-storage directories. The amount of space required depends on the characteristics and use of the VOBs and views.	All supported Windows operating systems

Glossary

Bitness	Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.
	31: The product or part of the product runs as a 31-bit application in a 31-bit operating environment.
	32: The product or part of the product runs as a 32-bit application in a 32-bit operating environment.
	64-tolerate: The product or part of the product runs as a 32-bit application in a 64-bit operating environment.
	64-exploit: The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.
Co-packaged	Additional products that are included in the product package.
Co-installed	Additional products that are included in the product package and installed when the product is installed.
Deployment unit	**Deployment Structure** identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

Deployment unit (continued):

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.

- Deployment units may be further divided into deployable **components**

Desktop deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

Server deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

Agent or client deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent of client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

Mobile deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

Hypervisor	A virtual machine in which a product can run on a guest operating system.
Limited operating system support	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
Operating system minimum	The minimum operating system maintenance level that is required to run on the product.
Prerequisite minimum	The minimum maintenance level that is required for the prerequisite to work with the product.
Product minimum	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
Supported software minimum	The minimum maintenance level that is required for the supported software to work with the product.
Maintenance Support Release	A Maintenance Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
